

GPS Tracker

Software developed by:

FIKO
SOFTWARE

M6x eAmundsen Tracker from MISOLIMA is a fairly new GPS-based

tracking device capable of storing max 234.000 GPS records in it's internal memory. Data can be downloaded using the FREE of charge **eAmundsen M6x** software where tracking data can be shown in the form or lines or point-by-point location data viewable in Google Earth, other map software or via our www.misolima.com website.

POWER SOURCE

The M6x eAmundsen Tracker are powered by 5VDC which can be provided by MISOLIMA ePowerGen series. One unit is for ordinary vehicle power socket while the other is connected directly to the battery power source. Both of them contain DC-DC switching power supply with wide power range for input power. (**not included**)

to be used in the vehicle cigarette lighter

Input 12-24Vdc
Output 5Vdc 500mA
